

Biometric Time Clock

BioClock 11 is a web-based employee management tool that utilizes the latest fingerprint recognition technology.

BioClock II is a time and attendance terminal that utilizes the latest proven fingerprint recognition technology.

BioClock II will automate your time and attendance collection by linking each time clock with a centralized database through network connections. Utilizing only a web browser, administrators and supervisors will be able to quickly and securely review and approve employee's time sheets for processing by payroll.

Benefits:

- Eliminates buddy punching
- Eliminates lost cards
- Notifies Managers of absent employees
- Reports tardiness and unauthorized overtime
- Saves time and money

Features:

- Network enabled – RS232, RS485, TCP/IP
- Patented fingerprint recognition technology
- Stores up to 30,000 transactions
- On board set-up and self diagnostics
- Easy to install and use
